Portfolio

SUMMARY

AI/ML Developer with a background in Agile methodologies. Experience in Python to build and deploy end-to-end intelligent applications from concept to production. Solves complex problems and contributes to a collaborative team at the intersection of software engineering and AI.

EDUCATION

DCRUST *Haryana (India)*
Bachelor of Technology (B-Tech) | GPA: 8.00 **2026**

Homerton Grammar School *Haryana (India)*
High School **2022**

PROJECTS

Network Security Pipeline
Python, Scikit-learn, MLflow, AWS, Github Actions, Modular Programming, Github, Github
Built an industry grade, end-to-end machine learning application to detect network security threats and phishing attempts. The project emphasizes production-ready MLOps proctices and highly maintainable code architecture.

- Developed a robust ETL pipeline and trained a classification model using a phishing dataset to accurately identify malicious network activity.
- Implemented strict modular programming principles with custom exception handling to ensure fault-tolerant and scalable code.
- Integrated rigorous experiment tracking and code versioning to monitor model performance and manage the ML lifecycle efficiently.
- Architected an automated CI/CD pipeline to streamline integration and successfully executed cloud deployment on AWS.

Loan approval
Python, Streamlit, REST API, AWS EC2, Docker, Machine Learning, GitHub Github
Built an end-to-end machine learning application to provide comprehensive loan assessments rather than simple binary approvals. The system evaluates eligibility and predicts approved loan amounts.

- Designed a Two-Stage ML pipeline utilizing a dual-model architecture.
- Evaluated strict loan eligibility and subsequently predicted the approved loan amount.
- Developed a robust backend REST API and integrated it with an interactive Streamlit application.
- Containerized the complete application and successfully executed cloud deployment on an AWS EC2 instance.

SKILLS

AI & Machine Learning & GenAI: Regression, Classification, Supervised/Unsupervised, XGBoost, NLP, Keras/tensorflow, PyTorch, Transformers, Langchain, Langraph
MLOps & Cloud: Docker, CI/CD, Git & Github, Version Control, Airflow, MLflow, Dagshub, AWS, Model Deploymenet
Data Engineering & Databases: Python (Pandas, NumPy), SQL, NoSQL, VectorDB, Data Cleaning, Data Modeling
Software Development: FastAPI, Flask, REST APIs, Streamlit, Pydantic, Modular Programming
Languages: English, Hindi
Soft Skills: Fast learner, Collaborative, Team work

CERTIFICATIONS

- **Programming, Data Structures and Algorithms using Python** - NPTEL, IIT Madras (2023)
- **Training in Data Science and Machine Learning** - IKIGAI Lab Pvt. Ltd. (2025)
- Complete MLOps Bootcamp With 10+ End To End ML Projects – Udemy, Krish Naik (2026)
- **2.0 Ultimate Data Science & GenAI,Agentic AI Bootcamp –** Krish Naik Academy (est. 2027)
