SUMMARY

AI/ML Developer with a background in Agile methodologies. Experience in Python to build and deploy end-to-end intelligent applications from concept to production. Solves complex problems and contributes to a collaborative team at the intersection of software engineering and AI.

EDUCATION

DCRUST

Bachelor of Technology (B-Tech) | GPA: 8.00

Haryana (India)

2026

Homerton Grammar School

High School

Haryana (India)

2022

EXPERIENCE

Internship, Python Programming

June 2024 – July 2024

CodSoft

Participated in a Python programming internship. Gained practical experience in Python development and applied programming concepts to real-world tasks.

Training in Data Science and Machine Learning

June 2025 – July 2025

IKIGAI Lab Pvt. Ltd.

Completed training focused on data science and machine learning principles. Developed foundational knowledge in various AI/ML techniques and their applications.

PROJECTS

Movie Recommendation System

Python, Streamlit, CSS, HTML, Pandas, NumPy, Scikit-learn, TMDB API, [Link](#)

Designed a recommendation system capable of suggesting similar movies by analyzing features of previously watched content. This system processes movie data and provides personalized recommendations to users.

- Engineered a content-based recommendation system by processing the TMDB dataset with Pandas and NumPy.
- Transformed textual features (genres, cast) into vector space using Scikit-learn's CountVectorizer.
- Developed the recommendation logic using Cosine Similarity to compute high-dimensional distance metrics.
- Ranked the top 5 results and integrated the TMDB API to fetch real-time movie posters and details.

SKILLS

AI & Machine Learning: Regression, Classification, Ensemble techniques, Time Series, NLP, Tensorflow

MLOps: Docker, CI/CD, FastAPI, Git, Model Deployment, Version Control

Data Engineering: Python, Pandas, NumPy, SQL, PostgreSQL, MySQL, Data Cleaning, Data Modeling

Software Development: Flask, Django, REST APIs

Additional Skills: Agile methodologies, Fast learner, Collaborative, Team work, AI application understanding

Languages: English, Hindi

Project Technologies: Streamlit, CSS, HTML, Scikit-learn, CountVectorizer, Cosine Similarity, TMDB API

CERTIFICATIONS

• **Programming, Data Structures and Algorithms using Python** - NPTEL, IIT Madras (2023)

• **Python Programming** - CodSoft (2024)

• **Training in Data Science and Machine Learning** - IKIGAI Lab Pvt. Ltd. (2025)
